Dear Madam,

The online-study on IC/BPS and its implications on sexuality and partnership was completed by the end of 2007. A considerable number of female patients have participated and I would like to thank all of them for the efforts taken. My special thanks go to Mrs. and Mr. Hensen who supported me with this study in every possible way.

The results of the study are very interesting and can be seen in the attached power-point-presentation. Comments and further ideas are appreciated.

Yours faithfully,

Dr. Dara Lazar
